Grant,

The two options you requested were:

Option One: Center building with one open bay, wall studs and glazing by others with the two other attached buildings with mezzanines:
Delivered Price \$407,096.00

2nd Option just the center building with one open bay wall studs and glazing by others and both side buildings out of wood by others.

I included in this price matching roof panels and trim for the two buildings constructed out of wood to match the center building, make sense?

Price delivered \$191,175.00

Here is the new ifc model. <https://autode.sk/4eKp9tF>

We're with you all the way. [®]
